

Techivation Releases the M-Blender

Techivation introduces the M-Blender, a Spectral Sidechain Shaper plugin designed to resolve frequency masking issues in audio mixing by creating extra space between sounds.

M-Blender creates space in a mix by cleaning up clashing frequencies between instruments. It uses true spectral processing to dynamically carve space for the side-chain signal and prevent frequency masking. Techivation's M-Blender offers an intuitive and contemporary GUI (Graphic User Interface) equipped with an accurate graphic analyser, designed with a modern approach.

M-Blender key features:

- Sensitivity
- Softness
- Frequency range
- Dry/wet Mix
- Diff & Sidechain
- Analyser
- Make Up Gain
- Left-Right/Mid-Side balance
- Input-output-diff level meters
- Scaleable user interface
- Internal On/Off Switch
- Undo/redo options
- A/B Switch

Pricing and availability

M-Blender is now available at techivation.com for an introductory offer of 45.00 USD; owners of other premium Techivation plug-ins can get a special loyalty offer of 35.00 USD, and those who own all the other Techivation plug-ins can have it for only 25.00 USD until November 30, 2023.

The original price will be 90.00 USD after November 30, 2023.

The Techivation M-Blender can be downloaded in VST, VST3, AU, and AAX formats for any compatible DAWs that also support sidechain processing, including Logic, Cubase, Ableton Live, Pro Tools, FL Studio, Studio One, etc., available for both Windows and macOS. Techivation plug-ins also support the Apple M chip natively.

Free Trial

A fully functional 14-day free trial for M-Blender is available on the [Techivation website](https://techivation.com), offering users to test the plug-in before committing to a purchase.

About Techivation

Techivation is a UK-based creator of audio and music technology. Since 2021, the company has been developing easy-to-use, versatile, and practical plug-ins to assist both beginner and professional audio and music artists in finding practical solutions. Techivation remains fully invested in its vision of producing quality tools. These tools are designed to help music producers and engineers innovatively improve their music and audio sound, simplify their workflow, and focus more on creativity.
