

Techivation T-Exciter

User Manual

The screenshot displays the 'T-Exciter' software interface. At the top left is the Techivation logo and the product name 'T-Exciter'. To the right are a power button, 'A/B' mode with 'copy to B' text, and a menu icon. The main control area features two vertical sliders for 'Input' and 'Output', both ranging from -15 to 15 and currently set at 0. A large central circular gauge labeled 'EXCITEMENT' shows a 50% level. Below this are two smaller circular gauges for 'Mix' (set at 100%) and 'Width' (set at 50%). To the right of these gauges are four effect mode buttons: 'Shine', 'Air', 'Wet', and 'Crisp'. The bottom of the interface shows the 'Techivation' logo on the left and 'Smooth Sound Exciter' on the right.

Techivation T-Exciter

- Output/Input Level Controls
- On/Off Button
- Presets
- Menu
- Oversampling set at 8X

Techivation T-Exciter

Overview

Techivation T-Exciter is a plug-in designed to bring life and energy to sounds. It helps brighten the high frequencies in a very musical and smooth way. It also adds more width to sound without losing its power. This plug-in helps you instantly bring any sounds to life.

Techivation T-Exciter

Excitement Knob

By turning the Excitement knob, you can determine how much excitement, sharpness, clarity, or air to be added to the sound. It can go from subtle to aggressive from 0 to 100%.

Quick tips:

- Double clicking on Excitement knob will set back its value to default.

Techivation T-Exciter

Width

This tool allows you to add dramatic or subtle depth and width to your mono, narrow mixes, or audio files by widening your stereo image.

Mix

The "Mix" option controls the mix of the two input and output signals. This feature makes it ideal for parallel processing.

Techivation T-Exciter

Undo/Redo Options

Undo and Redo options are built inside the plugin so you no longer need to worry about losing setting values.

Techivation T-Exciter

A/B Switch

Quickly and simply compare different settings to find out which would fit well. The “Copy to B” allows you copy the settings you’ve made in the A version, to see how small tweaks would sound in comparison.

Input Level

Reduce or increase the input volume level in dB.

Output Level

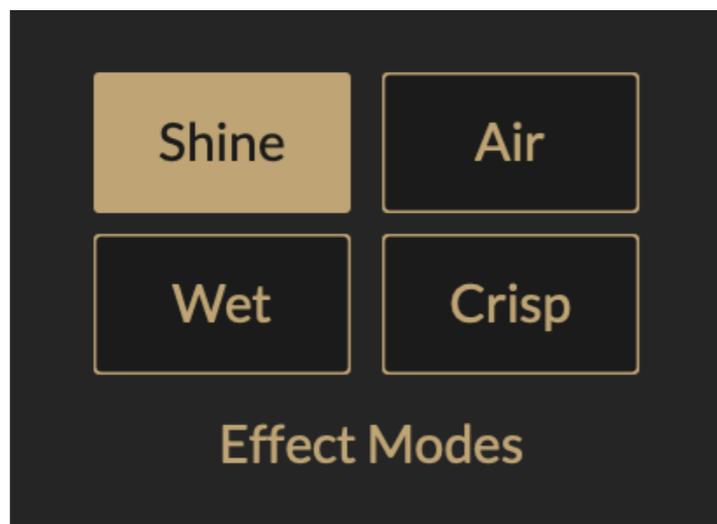

Reduce or increase the output volume level in dB.

Techivation T-Exciter

Effect Modes

- Air:** Adds more air to your sound, making it more musical.
- Shine:** Makes the sounds sharper and brighter, making the details more audible.
- Crisp:** Brings the sounds more to the front and let it cut through the mix.
- Wet:** Glues the sounds together more nicely, and adds overall excitement, and enhances the ambience.

Techivation T-Exciter

On/Off Button

Bypass button enables or disables the plugin's effect on the output sound. Smooth, click-free transitioning makes this parameter ideal for automation.

Menu

A quick menu of useful features:

- Undo
- Redo
- Show Presets Folder
- Presets
- Save Preset As...
- Load Preset...
- Default Preset
- GUI Scale
- Account info
- About T-Clarity
- Support

Techivation T-Exciter

Save - 'Default'

Saves your current plug-in settings as the default.

Show Presets Folder

Opens the folder where presets are located.

Presets

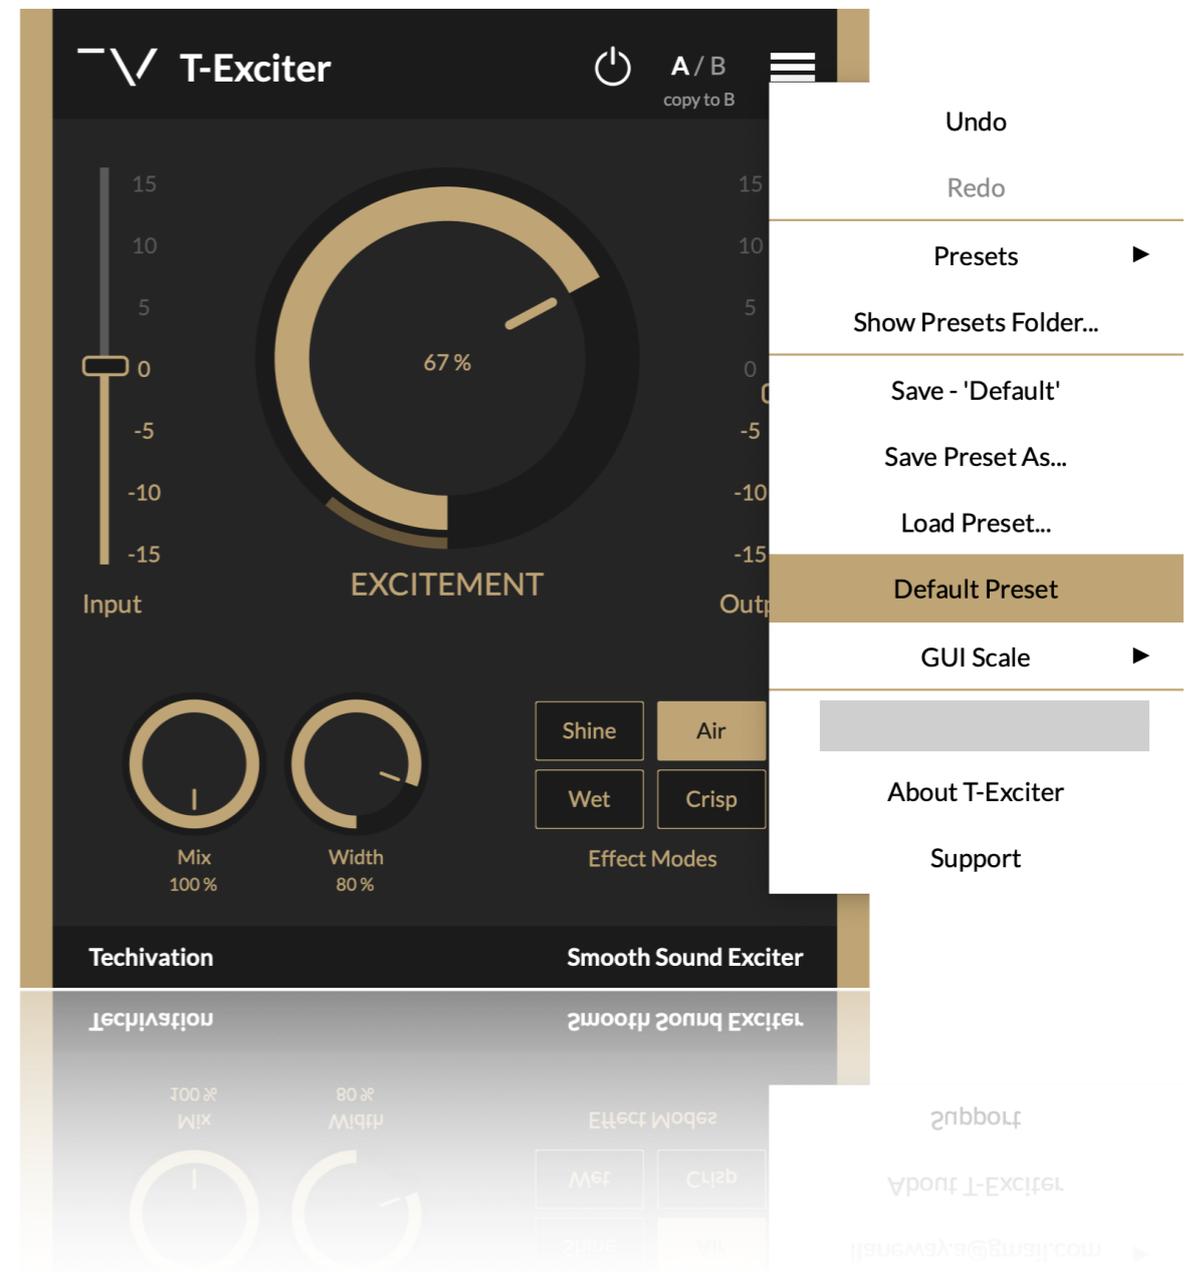

Allows you to load presets from the T-Clarity's built-in preset menu.

Save Preset As...

Allows you to save your own custom presets in your computer's presets folder.

Load Preset As...

Allows you to load presets from your computer's presets folder.

Techivation T-Exciter

Default Preset

Changes the settings to default.

Oversampling 8X

T-Exciter has a set oversampling at 8X, while we use the latest oversampling processing technology to keep the plug-in very light on CPU, even though it's always set at 8X!

It also allows you to use the plug-in for real-time tracking, without causing any latency issues.

Techivation T-Exciter

GUI Scale

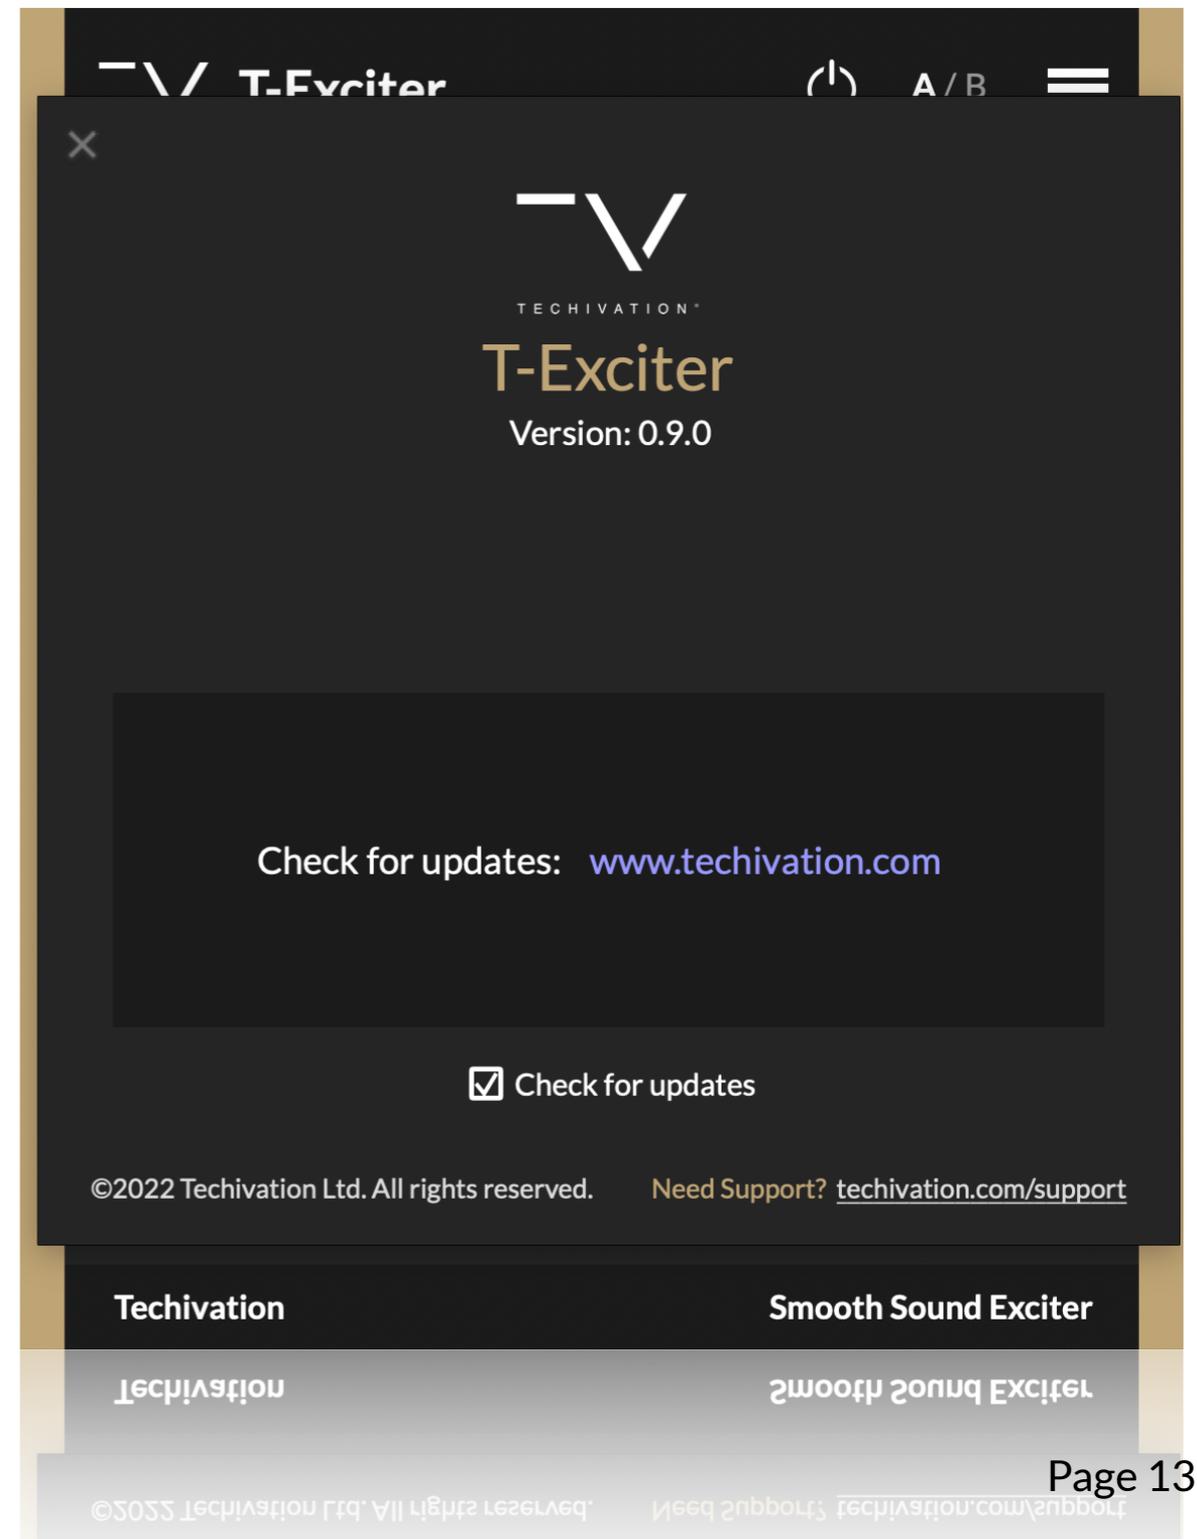

The GUI scale may range from 80% to 150%.

About T-Exciter

This window can be opened from the plug-in's menu which contains brief information about your current plug-in version, new plug-in updates and quick access to the support page.

Support

This will quickly take you to the Techivation support web page, in case you need help with anything.

Techivation T-Exciter

Installation

A software download button appears in your Techivation account on techivation.com after your purchase. You can always go to [our website](https://techivation.com), log in to your Techivation account and download the plug-in installers.

After downloading, unzip the file and select either Mac or PC depending on your system. (Warning: don't run the PC file on a Mac and vice-versa).

- Mac: Double click on the PKG installer and follow the instructions
- PC/Windows: Double click on the setup file and follow the instructions

T-Exciter Activation

Activating T-Exciter is simple. After you make the purchase, you download the installers from your [Techivation account](https://techivation.com), install it on your system, and you can just sign in to the plug-in using your Techivation account's email and password to have it activated on your system.

As you activate it, you can continue using the plug-in on your system while being offline too.
